Who's Keeping Count?

Cricket Scoreboard Systems specialise in the design, manufacture, installation and maintenance of manual and electronic cricket scoreboards. Despite being a relatively new business, we already have an impressive clientele ranging from small clubs to major national sports associations, schools, colleges and universities.

We are part of UK Scoreboard Systems, dealing in the manufacture, installation and supply of parts to the cricket sector.

Whether large or small, each of our clients receives the same friendly, personal service - and we're always on-hand to offer all the help and advice that you might need.

So, if you are considering the installation of a new cricket scoreboard, or replacing an old or inadequate system, then please contact us for a free quote, a system demonstration or a site visit.

Roof mounted cricket scoreboard

Upgrading an existing system.

Refurbishing an ageing system.

Construction Materials

Our electronic cricket scoreboards are built into an aluminium casing and painted matt black as standard. Alternatively, they can be powder coated in a variety of colours for a small, additional, charge.

Vinyl lettering is used for the captions on the scoreboards and all our electronic systems benefit from 6mm UV protected polycarbonate that has can be specially treated with an anti-glare coating for a small additional cost. This protects the display modules and eliminates glare from the scoreboard, allowing clear views of the numbers on display. The polycarbonate is secured with silicone sealed joints which help to ensure that the units are water tight and weatherproof.

Wireless Control Systems

All our electronic systems are supplied with a wireless remote control unit as standard. The control units have been designed for easy, no nonsense operation, however, should you require a hard wired control unit, this can also be accommodated.

Lightweight aluminium, weatherproof and portable.

Portable, easy to use remote control.

Wireless control from up to 125 metres.

With most of our wireless control systems the numerical information displayed on the Scoreboard is also displayed on the control unit. This means that the scorer does not need to see the scoreboard in order to operate it.

Display Modules

All our electronic cricket Scoreboards are built using seven segment display modules, this is the only suitable solution for cricket grounds. These are proven to be reliable and safe with excellent viewing capabilities, unlike LED systems.

Powering the Systems

Don't worry if you have no mains power at your club as our electronic systems operate at 12 Volts DC.

A battery pack is available to provide a safe and convenient alternative where mains power is not available.

Portability

As well as fixed systems, we are also able to provide portable electronic scoreboards and timing systems that can be easily transported, operated, dismantled and put into storage until your next match or event.

Bespoke, remotely controlled portable scoreboard system.

Systems built to your own requirement.

Easy to stow away after use.

Athletics Scoreboards and Timing Systems

We have a range of standard cricket scoreboards available and ready for shipment. In addition, we can construct units to your own sizes and specifications.

Manual Cricket Scoreboards

In addition to electronic cricket scoreboards, we also manufacture manually operated units, either 'off the shelf' designs or bespoke. These scoreboards are ideal for smaller clubs or organisations where funding is difficult, or where a more traditional look is required. All include your own club or sponsors name and can be wall mounted or free standing. Manual cricket scoreboards can be supplied in kit form for self-assembly. We only use quality components and materials ensuring a robust, reliable system that represents excellent value for money.

Manual Cricket Scoreboards - New and Replacement Parts

We stock the full range of spare parts for your manual cricket scoreboards - pricing details are available on request.

Telegraph Number Plates (spare numbers also available)
